

Sosius, the collaboration platform with purpose

Sosius is a leading online collaboration and team workspace platform for the enterprise. We are passionate about improving individual performance and recognition, enhancing productivity and employee satisfaction.

"The focus of the IUA is on collaboration and to support that we needed a slick but easy-to-use collaborative tool. The process of documentation management has been improved greatly through the Sosius system. It enables us to be more professional and to offer a better level of service to our members"

Lia O'Sullivan
Communications
and Projects Manager

"Over 2/3 of our total headcount, across multiple departments, use the service regularly, which has resulted in it becoming a core arena for planning and idea generation. Our staff interact on a daily basis and the Innovation application helps us identify and reward our most innovative and hard working employees."

Ben Adderley
Global IT Director

"We are constantly discovering new opportunities on the Sosius platform. And we look forward to involving new companies and organizations in our development projects."

Patrick Olsson
Manager
